

# Security and Surveillance

## Protecting Information and Infrastructure is a Fundamental Priority

Protecting information and infrastructure is a fundamental priority in today's high-tech environment. VT Group provides vital solutions for advanced physical and IT security systems to protect facilities and secure information networks.

### Integrated Solutions Expertise

Our nation and allies today have exceptional physical security challenges at home and abroad. On call for deployment worldwide, highly qualified VT Group personnel have the clearances and experience to work in high-security areas and on the most sensitive systems securing information networks, protecting physical facilities, and helping ensure business continuity. Our expertise includes the following solutions:

- CCTV
- Intelligent video, IP video management
- Access control including biometrics
- Intrusion detection and perimeter protection
- Surveillance systems
- Paging and mass notification
- Intercom systems
- Video teleconferencing (VTC)
- Radio-frequency identification (RFID)

“Thank you for providing such qualified personnel to perform this installation. Working with your team was a fantastic experience for me. Your people are very motivated and professional. They all seem to work well together...and produce a quality product. Thank you isn't nearly enough; know that I have gained a great deal of respect for each person involved, and for [VT Group] as a whole.”

— Project Manager,  
Centurum

## As Your Partner

VT Group's professional teams excel at timely and cost-effective turnkey solutions in challenging global environments. Our commitment to excellence ensures that our customers have exactly the security that they need, precisely where they need it, right when they need it. As the threat environment is constantly changing, our personnel are always searching for better, faster and less expensive solutions.

## Security and Surveillance Solutions

Our services include security systems assessment, design and engineering, installation design plans, equipment sales and installation, equipment/systems testing and maintenance and emergency repair.

Our teams serve to protect human, physical and information resources in many rigorous settings, including:

- Physical layer security of federal facilities, including nuclear weapon facilities
- Commercial physical security, including office buildings, campuses and prisons
- Anti-terrorism force protection (ATFP)
- Radio-frequency identification (RFID) systems
- Maritime onboard security systems
- Shipboard security modules (SSM)
- Computer-based hull perimeter lighting (HPL)
- Digital networked real-time and recorded video
- Intrusion detection systems
- Audible warning systems

Our teams excel at timely and cost-effective turnkey applications in challenging environments, including:

- Federal Buildings and Facilities
- Transportation and Infrastructure, including Seaports and Airports
- Commercial and Industrial Buildings and Facilities
- Hospitals and Healthcare Facilities
- Colleges and Universities
- Detention Facilities
